

Accuryn SmartFoley™

- IAP/16Fr
- Intra-abdominal Pressure
 - Urine output
 - Temperature

Accuryn SmartFoley™ potrero
Tray System

16 Fr IAP UO TEMP

REF: FGS-06-IAP.16FST

Contents

- Silicone Foley Catheter with two anti-reflux valves
- Securement Device
- Not made with natural rubber latex
- 10ml Sterile Water Syringe
- Alcohol Preparation Pad
- Fenestrated Drape
- Hand Sanitizer
- Lubricating Jelly (2x)
- Nitrile Gloves (L)
- Povidone-Iodine Swabs (3x)
- Skin Protectant Pad
- Soap Towellette
- Specimen Container
- Water Proof Drape

STOP Does this patient meet the CDC guidelines for indwelling urethral catheter use?

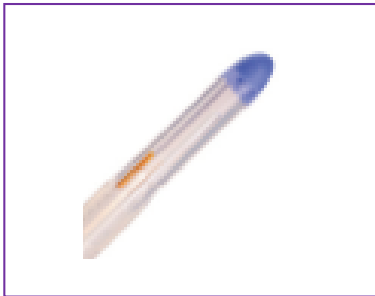

- Patient has acute urinary retention or bladder outlet obstruction
- Need for accurate urine output measurements
- Use for selected surgical procedures
- To assist in healing of open back or perineal wounds
- Patient requires prolonged immobilization
- To improve comfort for end of life care

Intended Use: The Accuryn Monitoring System is intended for use in the drainage and/or collection of urine, and in the monitoring of intra-abdominal pressure, and core body temperature in degree Celsius. The Accuryn Monitoring System is also intended for use in the monitoring of intra-abdominal pressure. The measured pressure can be used as an aid in the diagnosis of intra-abdominal hypertension (IAH) and the associated clinical syndrome of abdominal compartment syndrome (ACS).

ATTENTION: Do not use for monitoring of intra-abdominal pressure.
